

Homepage & About Us — Detailed Build Spec

This is a literal implementation spec, not a creative brief — copy is final, not a placeholder. Claude Code should implement exactly what's written here, not improvise wording or behavior.

PAGE 1: Homepage

Header (sticky)

- Transparent background over the hero; becomes solid warm-cream (#FBF6EC) with a subtle bottom border once the user scrolls past the hero section.
- Left: Galileo logo mark + "LearnCuriosity" wordmark.
- Right nav links: "How It Works," "Safety," "Pricing," "Log In."
- Far right: solid CTA button, "Start Free Trial" — curious-teal background (#1B6E6B), cream text.

Section 1 — Hero

- Eyebrow label (IBM Plex Mono, small, uppercase, teal): "LEARN CURIOSITY"
- Headline (Fraunces, 600 weight): **"The answer can wait. The question can't."**
- Subheadline (Inter, regular): **"A daily mentor for curious kids — built on questions, never on screens that just entertain."**
- Sample dialogue card (already built): mentor question → child's answer → mentor follow-up question.
- Primary CTA button: **"Find Your Child's Mentor"**
- Directly beneath the button, small trust line with a small lock or eye icon: **"Every conversation is yours to read. Always."** — this line sits at the exact decision point on purpose, not buried further down the page.

Section 2 — Five Pillars trail

- Intro line above the trail (Inter, medium): **"Five ways of thinking, woven into every story."**
- Existing dotted-trail stamp-badge design (already built), five pillar icons, labels unchanged.

Section 3 — "We know what you're thinking." (the core persuasion section)

- Headline (Fraunces): **"We know what you're thinking."**
- Body copy (Inter, comfortable reading width, ~600px max):

"An AI talking to your child should make you pause. It made us pause too — which is exactly why we built this differently from any chatbot you've heard about."

- Three-column layout (stacks vertically on mobile), each with a small icon, a bold one-line claim, and one supporting sentence:
 1. Icon: **ti-message-circle-off** (or similar "limited scope" icon). **"It only knows one thing: today's lesson."** — The mentor can't roleplay a friendship, can't wander into open conversation, can't be anything other than a guide through today's story. That's not a limitation we apologize for — it's the entire design.
 2. Icon: **ti-eye**. **"You can read every word."** — Every conversation is logged and visible on your parent dashboard. Not a summary, not a sample — the actual conversation, every time.
 3. Icon: **ti-shield-check**. **"Built on Claude, by Anthropic."** — We chose the AI company built around safety as a starting design constraint, not an afterthought bolted on later.
- Closing line, set apart visually (slightly larger, centered): **"This isn't a chatbot we made safer. It's a mentor we built to never be anything else."**

Section 4 — Closing CTA

- Headline: **"Let your child ask their next question."**
 - CTA button: **"Start Free Trial"**
 - Small subtext beneath: **"7 days, full access, cancel anytime."**
-

PAGE 2: About Us — one-page scrollytelling story

Functional behavior (exact, not open to interpretation)

- Each section below starts at low opacity (0.15) and offset 20px downward, animating to full opacity and normal position when it enters the viewport (use Intersection Observer, threshold ~0.3).
- Each section animates in **once only** — scrolling back up and down again should not re-trigger the animation.
- **Scroll progress trail:** a thin vertical dotted line runs down the left side of the page (desktop) or top (mobile), echoing the homepage's dotted-trail motif. As the user scrolls, the portion of the line already passed fills in solid gold (#E8A33D); the upcoming portion stays a faint dotted outline. This is the literal "story wheel" feature — a visible sense of progress through the story, not a generic progress bar.

- Background stays warm cream throughout; no section changes the base background color.

Section 1 — Opening

- Headline (Fraunces): **"Every child starts as a scientist."**
- Body: "Before they're taught to find the one right answer, every child is a relentless asker of 'why.' Somewhere between kindergarten and middle school, most curriculums quietly train that instinct out of them, in favor of speed and the correct bubble on a test. We built Learn Curiosity on the opposite bet: that curiosity, protected and guided instead of managed out of a child, is the most powerful learning engine there is."
- Illustration: a small constellation-style fox or owl, stars connected into its outline, positioned to the side of the text, not behind it.

Section 2 — Socrates

- Headline: **"2,400 years ago, someone figured this out."**
- Body: "Socrates never lectured. He asked. He believed the best way to help someone think clearly wasn't to hand them a conclusion, but to ask the question that helped them find it themselves. That's not a teaching trend — it's the oldest, most tested method of building a real thinker that exists. It's also the only method our mentor is allowed to use."
- Illustration: flat silhouette of Socrates, same brand illustration style as the Galileo mark (charcoal silhouette, cream rim-light edge), no constellation treatment needed here — this one stays a clean historical silhouette.

Section 3 — Galileo

- Headline: **"Looking up changed everything."**
- Body: "Galileo didn't discover the moons of Jupiter by being told they existed. He looked, and asked what he was seeing, and kept asking. That's the spirit behind every mentor on this platform — not handing a child a fact, but handing them a telescope."
- Illustration: the existing finalized Galileo logo artwork, larger scale here than the header version.

Section 4 — Trust & Safety (the deep-dive version, longer than the homepage's)

- Headline: **"Now, about letting an AI talk to your child."**
- Body: "We'd be skeptical too. Here's exactly how this works, with nothing left vague:"
- Bullet list (not paragraph form — this section should read as a checklist, deliberately):
 - "The mentor only ever discusses today's lesson and your child's own questions about it. It cannot roleplay a friendship, a relationship, or an identity of its own — that capability simply isn't part of what we built."

- "Every single conversation is logged and visible to you, in full, on your parent dashboard. Not a sample. Not a summary. All of it."
- "We built this on Claude, made by Anthropic — the AI company that treats safety as a starting design constraint, not a patch applied after something goes wrong."
- "If a question veers somewhere it shouldn't, the mentor redirects gently and your dashboard gets a note. It never goes cold silent, and it never just answers anyway."
- "We will never build an advertising profile from your child's data. Said plainly, because it should be."
- Illustration: a few small real-animal silhouettes (owl, fox) scattered loosely around this section, calmer and sparser than other sections — this section should feel the most serious and the least decorated on the page.

Section 5 — Closing

- Headline: **"Let your child ask their next question."**
 - CTA button: **"Start Free Trial"**
 - Subtext: **"7 days, full access, cancel anytime."**
-

Implementation note for Claude Code

Build the homepage first, confirm it renders correctly, then build the About Us page using the same component patterns (fonts, colors, spacing) already established on the homepage — don't introduce new type sizes, colors, or spacing values not already defined in the Tailwind theme.
